## handi ™ mate

### ■ Description

The HandiMate™ cleaning tool provides a simple, handheld device to assist in removing all types of dust and debris from optical connectors. It is highly effective as a dry cleaner against contaminants such as dust, lint and oils. The HandiMate™ also supports wet cleaning processes used to remove heavier debris. The patented “Slide-Guide” feature uses Seikoh Giken’s unique “Clean and Advance” technology to continuously provide a fresh cleaning surface after each use.

### ■ Features

- Palm sized, ESD compliant anti-static casing.
- Non-woven microfiber material supports both dry and wet cleaning processes.
- Continuous “Clean and Advance” technology controls material and reduces waste.
- Patented “Slide-Guide” supports cleaning of most common types of connectors.
- Pop-up cover prevents contamination of cleaning material.

### ■ Applications

- Customer premises troubleshooting / maintenance.
- Hubsite, CO, Headend routine maintenance.
- New installation / Final assembly environments.
